

Revanth Balaji Pinnamaneni

Eluru, Andhra Pradesh 534432 • 7842310405 • revanthpinnamaneni@gmail.com

I am a motivated Computer Science freshman with a strong passion for developing innovative software. I have good skills in programming language Python and experience in web development and databases.

Experience

JAN 2023 – MAR 2023

Data Engineer | AICTE | Virtual Internship

I completed the AICTE 10-week virtual internship course for data engineers, gaining essential skills in data management, analysis, and engineering. By the end of this internship I am capable of creating and maintaining strong data solutions.

Projects

JAN 2025 – May 2025

Query Assistant for Conversational Database Access Using LLM

The Conversational Database Query Assistant allows users to query databases without SQL knowledge in natural language, which makes database querying more accessible. It utilizes NLP technology to transform the user input into structured SQL queries for easy retrieval of data. This makes accessibility better, reduces learning curves, and facilitates applications across industries.

JUL 2024 – NOV 2024

Educational Chatbot using NLP

Worked on an Educational Chatbot with NLP project. By using Natural Language Processing (Rasa NLU) & AI models (Rasa Core with RNN) techniques, This is an AI-powered web assistant for student queries. This can understand and respond to questions in natural language, offering explanations, and answering questions on a range of educational topics.

MAY 2023 – JUN 2023

E-Commerce Website for Clothes

Developed a web application using HTML, CSS, and Java that enables customers to browse, select, and purchase clothes online. This application also enables users to register and creates accounts for a personalized shopping experience.

Skills

Java • Spring Framework • Problem Solving • OOP • Python • SQL/Data Base • Data analyst • HTML/CSS • Excellent time management skills • Public speaking

Certificates

Python for Data Science

I explored Python programming fundamentals, learned data manipulation and analysis with libraries like Pandas and NumPy, mastered data visualization techniques using Matplotlib, and gained knowledge in statistical data analysis and the basics of machine learning.

ORACLE

I have completed the Oracle Database Foundation course, which gave me a solid understanding of Oracle database architecture, SQL, and data modeling. I am also skilled in managing data, ensuring its integrity, and optimizing database performance. I also have knowledge in database security, backup, and recovery processes.

COMPUTER NETWORK

I completed a Computer Network course that taught me about network architecture, protocols, LAN and WAN design, routing, switching, network security, and wireless communication. I gained practical skills in network configuration and management.

Education

SEP 2021 – PRESENT

Bachelor of Technology | SRM Institute of Science and Technology | Chennai, India

Computer Science and Engineering • 8.19 CGPA

APR 2021

State Board of Intermediate Education | Sri Chaitanya Junior College | Eluru, India

MPC • 75.1%

APR 2019

Central Board of Secondary Education | Sir C R Reddy Public School | Eluru, India

5.6 GPA

Activities

Travel • Watching Movies • Riding • Reading Books
