

REVANTH BALAJI PINNAMANENI

Eluru, Andhra Pradesh 534432 • +91 7842310405 • revanthpinnamaneni@gmail.com • github.com/Revanth-0405

PROFESSIONAL SUMMARY | Portfolio: [revanth-0405/Mywebpage](https://revanth-0405.github.io/Mywebpage)

Computer Science graduate and Software Engineering Intern with practical experience in back-end development, RESTful API development, databases, and cloud technologies. Solid background in OOP, SQL, and Java, with experience in designing and troubleshooting issues in scalable back-end systems. Currently working on gaining more experience in the Microsoft .NET framework, ASP.NET Core, C#, Entity Framework Core, and SQL Server

TECHNICAL SKILLS

Languages:	C#, Python, Java, SQL, HTML/CSS
Backend & Frameworks:	Flask, ASP .Net core, Rest API's, Java Spring Framework, OOP
Databases & Cloud:	PostgreSQL, AWS DynamoDB, Oracle Database, AWS Services, Cloud-based Workflows
AI/ML & Data:	LLM Integration, Natural Language Processing, Rasa NLU, Rasa Core (RNN), Data Analysis

PROFESSIONAL EXPERIENCE

HEU.AI — *Software Engineer Intern* Feb 2026 – Present

- Develop and maintain Python and Flask backend services and RESTful APIs supporting automation, social publishing, compliance, scheduling, and AI-powered workflows.
- Design and work with PostgreSQL and AWS DynamoDB data models for application data, configuration, workflow state, and production backend operations.
- Implement and debug AWS asynchronous workflows using Lambda, SQS, and Boto3, including consumer flows, retry handling, workflow-status updates, and event-driven processing.
- Investigate production issues across APIs, database records, webhooks, scheduled jobs, and third-party integrations; trace logs and persisted state to perform root-cause analysis and implement fixes.
- Develop backend features including per-platform retry handling, content-source configuration, social-platform integrations, scheduling flows, compliance operations, and workflow state management.
- Use Git-based development, code reviews, and automated/manual testing to validate backend changes and reduce regressions.

AICTE (All India Council for Technical Education) — *Data Engineer Intern* Jan 2023 – Mar 2023

- Completed an intensive 10-week data engineering virtual curriculum focused on end-to-end data management, ingestion, and analytical pipelines.
- Designed and maintained structured data solutions, gaining practical proficiency in processing large datasets and ensuring data quality.
- Developed analytical models to interpret complex data structures, laying the foundation for data-driven organizational decision-making.

KEY PROJECTS

Query Assistant for Conversational Database Access Using LLM

Jan 2025 – May 2025

- Developed a backend application that converts natural language into SQL queries using REST APIs and database schema mapping.
- Designed modular service architecture following object-oriented principles.
- Worked with relational databases and query optimization techniques.

Educational Chatbot using NLP & AI

Jul 2024 – Nov 2024

- Developed an AI-powered web assistant tailored for student queries using Rasa NLU for intent classification and Rasa Core with Recurrent Neural Networks (RNN) for dialogue management.
- Enabled the system to comprehend and contextually respond to complex educational queries, delivering instant explanations and learning support.

E-Commerce Platform for Apparel

May 2023 – Jun 2023

- Engineered a responsive web application using Java, HTML, and CSS allowing seamless browsing, selection, and purchasing workflows.
- Integrated a secure user registration and account management module to deliver personalized shopping experiences and persistent cart data.

EDUCATION

SRM Institute of Science and Technology — *B.Tech in Computer Science and Engineering* Sep 21-May 25
Chennai, India • **CGPA: 8.19 / 10**

Sri Chaitanya Junior College — *State Board of Intermediate Education (MPC)* Class of 2021
Eluru, India • **Percentage: 75.1%**

Sir C R Reddy Public School — *Central Board of Secondary Education (Class X)* Class of 2019
Eluru, India • **GPA: 5.6 / 10**

CERTIFICATIONS

Oracle Database Foundation: Comprehensive training in Oracle database architecture, SQL, data modeling, security, backup, recovery, and performance optimization.

Python for Data Science: Mastered fundamentals of data manipulation, machine learning basics, and statistical visualization using Pandas, NumPy, and Matplotlib.

Exploratory Data Analysis (EDA) – FutureSkills Prime (NASSCOM): Learned the fundamentals of Exploratory Data Analysis, including data cleaning, preprocessing, statistical analysis, and data visualization. Gained hands-on knowledge of identifying patterns, trends, and outliers in datasets using analytical techniques to support data-driven decision-making.

Generative AI with Large Language Models – DeepLearning.AI & AWS: Practical experience gained on Large Language Models (LLMs), such as the transformer model architecture, prompt engineering, fine-tuning principles, Retrieval Augmented Generation (RAG), and how to develop generative AI applications with AWS.
